

PATENTED WEARABLE LIGHT TECHNOLOGY

THE POWER OF *The patch!*

The patented X39 patch is a form of wearable light technology.

The X39 patch is made from organic nanocrystals - a combination of amino acids, water, stabilized oxygen, sugars and salts that form a crystal lattice structure.

When X39 is placed on your body, the patch reflects your own body's light back into your tissues. This process is called photobiomodulation or light making change in your body. Light works fast to support the natural flow of energy, activating new, younger healthy cells responsible for repair and regeneration in a non-transdermal and non-invasive way.

Our cells are constantly wearing out, forcing our body to work around the clock to make new and healthy cells. The X39 patch activates your new healthy army of cells. Even if you don't immediately feel the effects, rest assured your new cellular army is hard at work repairing your most critical issues first before moving on to something that you may feel.

ABSTRACT

Embodiments enables a wearable phototherapy apparatus that produces beneficial effects to a human body such as activation of stem cells, improvement in strength, improvement in stamina, pain relief via a non-transdermal container. May include an optional transdermal container that releases or increases copper peptide GHK-Cu in a subject's body. The non-transdermal apparatus reflects or emits specific wavelengths of light to elevate levels of the copper peptide GHK-Cu in the body.

Some people experience results within 1 - 7 days.

Most experience results within 30 days. Know that

within 24 hours the X39 patch starts restoring 4,000 genes to a younger, healthier state.

Wear the X39 patch 12 hours ON to activate and repair and 12 hours OFF. Apply a new patch daily. For deep healing, wear X39 patches 1 month for every decade you are old.
